Recently winning the “Best of NeoCon” awards for Innovation and [Sustainability](#) at Chicago’s 34th NeoCon Awards, [Ojmar’s OTS20 Batteryless lock](#) is the first battery-free smart lock on the market. Widely regarded as one of the most prestigious awards in the commercial interior design industry, the “Best of NeoCon” accolades highlight pioneering solutions that showcase exceptional innovation and design, and this year, a total of 126 awards were presented across 50 categories, with Sustainability, Innovation, and Business Impact being the most prominent.

Representing a paradigm shift for lockers and [office](#) furniture, the OTS20 range requires no batteries, no accumulators, no wires and no maintenance – offering a greener alternative to locker security. The innovative locking system is self-powered by revolutionary “Push Power” [technology](#), where the user generates the necessary energy to operate it by pressing the nozzle, eliminating the need for external power sources. This mechanism can therefore help organisations such as corporate offices of gyms transform into more sustainable spaces and achieve their carbon footprint reduction goals.

“We are especially proud to receive two ‘Best of NeoCon’ awards for our latest launch, the OTS20 Batteryless lock,” says Ramon Gabika, General Manager of Ojmar. “This award is particularly significant for us as it acknowledges our commitment to technology, R&D and environmental care through the manufacture of cutting-edge locking solutions.”
