

# CENTER PARCS CASE STUDY

Center Parcs is one of the largest providers of holiday experiences in Europe

## THE PROJECT

### Client

- Center Parcs

### Locations

- Belgium, Netherlands, Germany, France, UK
- 2.2 million visitors annually only in UK

### Key Requirements

- Locks suitable for wet area environments
- Integration across with in-house access control system

## THE CHALLENGE

Center Parcs wanted to upgrade its locker solutions across its 27 parks across Europe. The new locks needed to be compatible with RFID, NFC, Wireless and Proximity operation and be able to work in areas of high humidity and moisture. The new locks needed to link in with existing systems and provide insights into customer usage and flow and pinch points.

## SOLUTION

Updating 30,000 lockers with the new OTS Advance locks from Ojmar.

The ability to gain unparalleled insights into usage with most up-to-date and versatile solution for complementing existing access control solutions.

A solution which complement perfectly any access or management system implemented in a facility.

A widely adaptable and suitable for integration with Mifare and many fitness control systems including Preva, Egym, Milon and Technogym.

## AT A GLANCE

Industry: LEISURE / RESORTS

**27** Resorts across Europe
